

Electronics or Engineering Student (f/m)

Rainbow Photonics is a company dedicated to the design and production of highly innovative optical terahertz systems.

For the expansion of our activities we are looking for support in the area of electronic/mechanical/maintenance and monitoring of prototypes and products and existing equipment.

We offer a part-time job (20-50%) with flexible hours.

Requirements:

- Basic electronics knowledge
- Experience with electronics soldering
- Interest in repairing and/or design of new equipment

Please send your CV to info@rainbowphotonics.com
