

Junior Software Developer C++/C#

Job type: non-academic, junior professional

Workload: 80-100%

Sector: information technology, software engineering

Starting date: Immediately or by arrangement

Region: Zürich, Wallisellen

Join our startup for software development in the field of high-quality digital document processing. Our small team of passionate experts focuses on developing high-quality, performant and maintainable products, including core components, that excel in the market. The rare domain knowledge as well as connections to industry partners, research, and domain institutions allow Kaleidodoc to drive a sustainable and efficient strategy. Are you a highly motivated, independently thinking, ever striving teamplayer, and passionate about deep diving into software engineering to unfold both your expertise and our company? Then read on and apply.

Your Responsibilities

In this position you will:

- Develop long lasting software from scratch in the domain of document processing
- Work on a complex and broad field of problems with emphasis on quality and performance
- Work and contribute in a small, specialist team of experienced engineers
- Be involved in the entire software cycle and scope including design, development, maintenance, quality assurance, devops, technical customer support, and documentation
- Have an impact on real-world problems and manage technical customer contacts
- Grow together with the sustainable growth of the company
- Receive coaching and training to realize projects and increasingly take responsibility
- Work with the following tools and technologies:
 - Modern C++
 - C# and .NET
 - Git and GitHub
 - CMake
 - Java
 - JavaScript
 - Python
 - Windows, Linux, MacOS, Android, iOS

Your Profile

- Bachelor or Master's degree from a university or Fachhochschule
- Area: Computer science, information technology, or electrical engineering
- Languages: English (fluently written and spoken), German (spoken or willing to learn)
- Passionate solver of complex problems
- Independent thinker and communicative teamplayer
- Eager to learn new things and motivated to deepen and broaden your knowledge
- Technical expertise
 - Must have basic knowledge and experience in:
 - Modern C++
 - An interpreted programming language such as C# or Java
 - Nice to have:
 - C#, .NET
 - Scripting language such as Python

We Offer

- Flexible and partially remote work time
- A working environment in which you can take responsibility and have a sustainable impact
- A wide working field which allows you to apply your acquired skills
- The opportunity to grow and deepen your know-how. Time to immerse yourself deeply in the subject of software development in the long term, while benefiting from the experience and support of our team
- An open company culture and strong team spirit to participate in and contribute to
- No old legacy systems to maintain ;)

Application

Did we catch your interest?

Please contact Christoph Reller and Matthias Flückiger (both ETH graduates from D-ITET) under hiring@kaleidodoc.com with:

- Motivation statement or letter
- Curriculum vitae including at least one reference
- Scan of diplomas or certificates

We look forward to hearing from you.
